OFFICIAL LABORATORY REPORT

Product/Brand/Manufacturer of Samples BizMax Business Beverages	Test Participant Group Source Vietnam People's Ground Force 273rd Tank Regiment	Test Date 04/04/19
---	---	------------------------------

Brief Overview of Testing Protocols

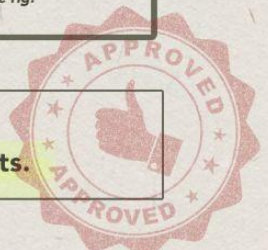

Our technicians were provided with a number of personnel from the 273rd Tank Regiment and the supplied beverages were administered to each participant.

The participants were then monitored closely for a twenty four hour period in a brightly lit secured room containing a variety of softplay items. Each personnel member completed a feedback form at various strictly timed intervals. The forms were then translated from Vietnamese to English by a professional external translator.

Note: In accordance with various overly restrictive laws regarding certain chemical administration and usage these tests were executed on a secure offshore rig.

Overall Conclusion from Test

The majority of participants experienced little to no long term debilitating side effects.

Timeline / Feedback Forms / Objective Observations

*P indicates feedback from participant numerical identifier through use of handwritten form (where written feedback was possible)
Observations were made by both HU and AW*

Time: 30 minutes

- p1: "I have nausea feeling"
- p2: "Throbbing shape sounds"
- p3: "Light is too bright everywhere"
- p4: "Room is make whispers"

Observations

Participants are generally happy and in good spirits with some mild horseplay.

Time: 2 hours

- p1: "I am beast"
- p2: "Eyes feel very big"
- p4: "Right arm is very tingles"

Observations

There is a lot of unidentifiable shouting, increased aggressive horseplay accompanied by vigorous physical activities.

Time: 4 hours

- p1: "Powerful liquid force inside chest vein"
- p2: "Back of leg is cold"
- p3: "I have the mild pain inside eyes"
- p4: "Hot is coming"

Observations

An air of calm has befallen many of the participants. Some are engaging in an enjoyable soft back/forth rocking. There is some crying but these certainly appear to be tears of joy.

Time: 8 hours

- p1: "I cannot recognise"
- p4: "I have become ghost"

Observations

Participant 3 has been moved off site and excluded from the test and report due to a completely unrelated illness.

Time: 24 hours

- p1: "I am completely normal and feel happy and healthy within myself"
- p2: "I am completely normal and feel happy and healthy within myself"
- p4: "The tremors still are making sometimes mouth cramps"

Observations

The majority of participants are now completely normal and appear happy and healthy within themselves.

CLINICAL TEAM

Professor Holbein Utsk (HU)
Dr Andrus Woldermeyer (AW)
Nurse Venya Krtofsky
Binh Hoang (Independent Translator)
6 representatives from GIA (all dialled in remotely)
3 representatives from GWBI (all dialled in remotely)

AUTHORISED BY
PROFESSOR HOLBEIN UTSK

I hereby certify that to the extent of my expertise and within the limits of the expectations of this test, and subsequent report, that the overall conclusion is valid and correct. As far as I'm aware.

SAMPLE SIZE: 3 PEOPLE

{Original sample size: 4}
We lost one during the test due to a completely unrelated illness.
